I have over 3+ years of experience as a highly skilled software developer. Specializing in Java Spring Boot and microservices architecture. Proficient in leveraging tools such as Spring Boot, Docker, OpenShift, and Kubernetes, Swagger UI to deliver robust and scalable solutions. Hands-on experience working with leading cloud platforms such as AWS and Google Cloud, proficient in deploying and managing applications effectively in cloud environments.

WORK EXPERIENCE

Malhub • Lagos • 12/2020 – Present

Software engineer • Full-time

- Transition APIs and SOAP applications to the Spring Boot framework.
- Containerization applications using Red Hat OpenShift.
- Created a Daily Split Cron Application to alternate between two third-party APIs for payments
- Designing and built a Virtual Fundable Wallet Application.
- Developing and implementing an Escrow Service using Spring Boot.
- Integrate with third-party APIs across various applications.
- Establish CI/CD pipelines using Azure DevOps.
- Build Docker containers for Spring Boot applications and deploy them on OpenShift.
- Designing a low memory Log file system that tracks the information and status of an application to help developers troubleshoot and check system health using Logstash-logback
- Optimize SQL Server stored procedures for managing large amount of data.
- Analyze and create new SQL Server database for all the administrative tool.
- Define new tables that the application requires to fulfill all the customer requirements
- Define goals and deadlines using agile methodologies with Scrum.

Nurman Innovation • ILORIN

Junior developer • Full-time

- Architected and implemented backend APIs using Spring Boot, demonstrating expertise in building scalable and efficient web services.
- Contributed as a team member to the development of a web-based Enterprise Resource Planning (ERP) System, showcasing collaboration and teamwork.
- Conducted unit testing using Mockito and JUnit, ensuring the reliability and functionality of the developed APIs.

- Developed a Customer Relationship Management (CRM) system, empowering organizations with efficient business process management capabilities, demonstrating proficiency in software development tailored to specific business needs.

EDUCATION

National Diploma in Blockchain Technology

BASE UNIVERSITY • Abuja • 03/2024 – Present

National Diploma in Mass Communication

Kwara state polytechnic • 12/2015 – 07/2017

PROJECTS

Cab Hailing service

Glopilots

Development of Cab hailing platform with Spring boot. This involves a comprehensive overhaul, where I am implementing cutting-edge Spring boot frameworks on back-end. With a focus on meticulous planning and agile development practices.

<https://api.test.glopilots.com/api-docs>

Banking application

NURMAN Tech

Building a new banking app with Java Spring boot. I committed to providing a secure and user-friendly experience to our customers. My primary responsibility is ensuring that the backend is running smoothly and is protected from potential threats.

https://github.com/Adebayour66265/Bank_App

Learning management System

Aya Gigs

Build a learning management system with Java Spring boot framework for African blockchain developer novices.

https://github.com/Adebayour66265/school_APIs

SKILLS

- Core java
- spring boot
- Kubernetes
- Hibernate
- Servlets
- JSP
- Git/GitHub
- Swagger/OpenAPI
- Logback/Log4j
- Security
- ORM concepts
- RESTful APIs
